Kāinga Ora releases its 2020 Sustainability Financing Impact Report

Kāinga Ora – Homes and Communities today released its 2020 Sustainability Financing Impact Report, which highlights the positive impacts expenditure financed by Wellbeing Bonds have on the wellbeing of our customers and sustainability of New Zealand housing.

This year's report features new measures that reflects our responsibilities to be net carbon neutral by 2050. Our commitment is demonstrated through the reporting of a preliminary carbon emissions profile and identification of key operational areas of risk.

One of Kāinga Ora's key aims is to deliver green buildings, as part of its build programme to deliver more housing across New Zealand sustainably, while reducing pollution and advancing customer wellbeing.

We also outline progress towards delivering retrofit upgrades of existing homes, construction waste diversion initiatives, and green buildings designed to be warmer, drier, healthier and more sustainable.

Ensuring positive social outcomes and helping our customers live well remains central to Kāinga Ora's purpose. Our impact is illustrated through social procurement outcomes, support provided through our Te Waka Urungi (Intensive Tenancy Management) services, and case studies highlighting how we are building thriving communities.

We hope you enjoy reading our report and if you would like to be added to our distribution list, please email treasury@kaingaora.govt.nz. Our [Investor Centre](#) also provides useful information on our borrowing programmes, credit ratings and Sustainability Financing Framework.
